Senior Software Engineer | Associate Technical Lead

Result-driven Senior Software Engineer and Cloud Consultant with over 5 years of post-graduation experience designing high-throughput data pipelines, microservices, and serverless architectures for global enterprises, including Air Canada. Graduated with Honors from the University of Moratuwa with a deep foundation in computer science and system engineering. Proven track record of operating independently in distributed, cross-functional remote teams and ready to step into high-impact technical ownership and leadership roles.

WORK EXPERIENCE

Serverless Guru • Remote • 02/2023 - Present

An advanced AWS cloud consultancy specializing in enterprise serverless architecture, microservices, and high-scale data hub transformations.

Cloud Consultant / Developer • Full-time

- Architected and built scalable microservices and an enterprise-grade cloud Data Hub for **Air Canada**, leveraging the Serverless Framework to optimize data processing and operational efficiency.
- Designed, implemented, and optimized distributed data integration workflows using **AWS Glue, Lambda, and Amazon S3**, managing high-volume data streams seamlessly.
- Engineered secure, high-performance relational database schemas using **MySQL**, ensuring low-latency data access and strict transactional integrity for core enterprise applications.

Global Market Technologies (Pvt) Ltd. (GTN) • Borella, Sri Lanka • 04/2021 - 02/2023

A global fintech leader providing API-driven embedded trading infrastructure, real-time capital market data, and portfolio management technologies for institutional clients worldwide.

Software Engineer • Full-time

- Engineered core market-price backend components responsible for the real-time and backlog extraction of high-frequency market data from global stock exchanges.
- Designed data dissemination modules delivering low-latency streams securely to thousands of concurrent enterprise clients and downstream financial products.
- Integrated automated testing and deployment flows using **Bitbucket, Bamboo, and TestLink**, cutting deployment cycles and maintaining high-quality code stability.

Mubasher Technologies (Pvt) Ltd. • Borella, Sri Lanka • 06/2019 - 12/2019

A leading regional fintech enterprise specializing in institutional brokerage engines, low-latency market data processing, and global financial intelligence software.

Intern Software Engineer • Full-time

- Developed a specialized component log analysis and anomaly behavior detection tool, reducing production issue troubleshooting times for backend price teams.
- Executed rigorous stress and load testing on core financial data modules to identify throughput bottlenecks and ensure platform stability under heavy market traffic.

EDUCATION

BSc (Hons) in Computer Science and Engineering

University of Moratuwa • Sri Lanka • 09/2016 - Expected 03/2021

G.C.E. Advanced Level Examination in Physical Science Stream

Mo/Malwaththawala National School • Wellawaya, Sri Lanka • 01/2001 - 08/2014

Result: AAA | Z-Score: 2.3135 | District Rank: 2

PROJECTS

Air Canada Cloud Data Hub

Serverless Guruprocessing pipelines on AWS to orchestrate flight and operational metrics, driving data-driven decisions across aviation divisions.

Engineered enterprise-level data processing pipelines on AWS to orchestrate flight and operational metrics, driving data-driven decisions across aviation divisions.

Data-Driven Taxi Driver QoS Evaluation

Final Year Research Project

Built an analytical framework using NLP and Apache Spark to calculate real-time quality-of-service scores and performance rankings for individual drivers in ride-hailing platforms.

Train Track

Software Engineering Module Project

Created a crowd-sourced train tracking Android application backed by a Python server and Firebase, utilizing user-permissioned GPS metrics to accurately display live transit routes.

Alt+it Automation System

MAS Holdings Partnership via Fcode Labs

Developed a cross-platform mobile application using Flutter and Dart that automated scheduling, quality measurements, and data logging for garment evaluation sessions.

SKILLS

Apache Spark, AWS (Lambda, Bitbucket Pipelines), CI/CD (Bamboo, Dart, DynamoDB, EC2), Express, Firebase, Flutter, Git, Glue, Java, JavaScript, MongoDB, MySQL, NestJS, Node.js, PHP, PostgreSQL, Python, React, S3, Serverless Framework, TestLink, TypeScript
